

# Jumbo Rolls

Jumbo rolls are single part, continuous, printed and processed forms on a large (40" to 50") diameter roll. They are used primarily by high-volume computer users in roll-fed systems on high-speed laser printers.

## Advantages

- Fast printing and reduced handling / downtime associated with replenishing boxed stock.
- 20% longer printer operation during each shift; one jumbo roll equals up to 40 cartons of conventional product.
- No forms carton disposal costs.
- Cleaner document edges because rolls are cut rather than burst, resulting in increased customer satisfaction.

## Products

- Credit card statements
- Invoices
- Promotional and solicitation letters
- Membership applications
- Mutual fund or investment statements
- Pressure seal jumbo rolls (Goshen only)
- Utility bills

## Production Facilities

- Livermore, CA
- Goshen, IN
- Charlotte, NC
- Emigsville, PA

Jumbo roll form products use the highest quality paper and can be printed in up to eight colors with 3", 5" or 6" core diameters. They are used primarily for statement processing, marketing promotions, insurance policies, and utility bills in high-volume printing environments. Additionally, jumbo roll products can be used in letter shops involved with direct mail.

Production locations have up to 8-color capability, as well as UV curing capabilities.
