

## Make Sure Your Checks Are Secure!

Protect your checks and financial future. Our check security features are unmatched in the industry and help prevent criminals from gaining control of your personal financial holdings – **guaranteed**.

Our high-quality security paper adheres to the latest ANSI standards (Check 21 Compliant) for image readability.

\*\*\* One of the most popular security features, the hidden message VOID technology, is also the most likely to fail. Manufacturers of the VOID can't keep up with the ever changing copier and scanner technology in today's world. That's why Wilmer layers on the security in our check and prescription pad stock to eliminate the ease of copying our products and leaving your customer at risk for counterfeiting. One of the best security features is the thermochromic ink that you can find on many of our stock products. This fades with heat and is impossible to copy. For more information regarding our security features, contact your local sales rep. For best results, the recommended colors are PMS 281 Blue, PMS 249 Plum, PMS357 Green or PMS 175 Brown. The best pantographs to use are the 933 Camo or the 008 Scallop Voids

## CHECK SECURITY FEATURES

- 1. Microprint Warning Band Border:** Reads "Original Document." When copied, the wording is not readable.
- 2. Toner Adhesion\*\*:** Prevents erasure and tampering with laser printed data.
- 3. Photocopy Void\*\*\*:** The word "Void" will appear when photocopied.
- 4. Security Warning Band Border:** The most popular security border available.
