- ❑ Script size on an 8 1/2" x 11" sheet

The image displays a variety of prescription forms from the New Jersey Prescription Program. These include standard prescription pads, laser sheets, and forms specifically for controlled substances. Each form is pre-printed with fields for prescriber information (name, address, phone, license, NPI), patient information, and medication details. They also feature a unique 15-digit identifier, a barcode, and a thermochromic 'Rx' symbol that fades with heat. The forms are designed to meet or exceed all State and Federal regulations for both Medicaid and controlled substance prescriptions.

*One of the most popular security features, the hidden message VOID technology, is also the most likely to fail. Manufacturers of the VOID can't keep up with the ever changing copier and scanner technology in today's world. That's why Wilmer layers on the security in our check and prescription pad stock to eliminate the ease of copying our products and leaving your customer at risk for counterfeiting. One of the best security features is the thermochromic ink that you can find on many of our stock products. This fades with heat and is impossible to copy. For more information regarding our security features, contact your local sales rep. For best results, the recommended colors are PMS 281 Blue, PMS 249 Plum, PMS357 Green or PMS 175 Brown. The best pantographs to use are the 933 Camo or the 008 Scallop Voids
