Fight Against Fraud! MEDICAID Compliant

Medium  
Security  
Laser Rx

7 Security  
Features

**Blue background on white paper**  
Will inhibit a forger from physically erasing written or printed information.

**Scallop Void Pantograph**  
Repetitive VOID appears across face when color copied.

**Artificial Watermark on back.**  
When held at an angle, words "SECURITY PRESCRIPTION" appear and cannot be reproduced.

**Thermochromic Ink**  
The Rx symbol disappears with hot breath or when rubbed briskly with finger. It will disappear when photocopied.

**Microprinting**  
A magnifying glass must be used to read the "original document" printed within the line. When copied or scanned, the lines become solid.

**Security Features Listed on Back**  
Advises recipient of the security features on pad. Allows recipient to verify and reject if the features do not match the listing.

PRESSTDLBSV

**Watermark printed in coin reactive ink**  
When rubbed with a coin, words "SECURITY PRESCRIPTION" change color

\*One of the most popular security features, the hidden message VOID technology, is also the most likely to fail. Manufacturers of the VOID can't keep up with the ever changing copier and scanner technology in today's world. That's why we layer on the security in our check and prescription pad stock to eliminate the ease of copying our products and leaving your customer at risk for counterfeiting. One of the best security features is the thermochromic ink that you can find on many of our stock products. This fades with heat and is impossible to copy. For more information regarding our security features, contact your local sales rep. For best results, the recommended colors are PMS 281 Blue, PMS 249 Plum, PMS357 Green or PMS 175 Brown. The best pantographs to use are the 933 Camo or the 008 Scallop Voids
