Accessories For Your PSMailers Equipment

Sound Cover

For PSM Models 5000, 7000 & 10K
(includes 1 front and 1 back cover per set)

Sound Cover Benefits:

- Provides extra safety for machine operation and performance.
- Reduces decibel level of equipment, enhancing work areas situated close to equipment.
- Higher speeds = louder operations. Sound covers are a **must** for high speed units.
- Protects rollers from dust and debris when not in use.

Cleaning Kit

These complete kits feature PSMailers recommended premium-quality products in one convenient, affordable package. Clean, condition, and protect your equipment investment (parts may vary depending on model).

PSMailers... *The Complete Solution*

PSMailers pressure seal self-mailer is designed to **fold, seal, and mail in much less time than conventional printing and mailing processes.**

There are a variety of PSMailers models to choose from, one for every size or volume business.

Everything you need is in one complete package: pressure seal documents and equipment. Whether you use PSMailers for payroll and/or report processing, accounting, billing, direct mail or one of the many other applications, you'll see a difference almost immediately in cost savings, greater productivity and more versatile document capabilities.

PSMailers Checks & Forms

Checks and forms are available in most popular fold types and are *guaranteed* to work with our equipment. PSMailers checks offer a wide variety of security features to prevent fraud and are Check 21 compliant.

PSMailers Fold Styles

There are six fold styles giving you virtually unlimited options for the various applications your business demands:

- The versatile Z-Fold, the most popular (Z)
- The Eccentric Z-Fold (EZ)
- The C-Fold (C)
- The Eccentric C-Fold (EC)
- The V-Fold (V)
- The Z-Fold, extra voucher (ZX)

Built-in Security Features

-  **Chemical Stain (24SP, 28TA):** Sensitized paper reacts to chemical attempts to alter check.
-  **Invisible Fluorescent Fibers in Paper (24SP, 28TA):** Fibers in paper stock are revealed under a black light.
-  **Microprinting Below Endorsement Area:** Line copy reads "Original Document." When copied, the wording is not readable.
-  **Padlock Icon:** Indicates check meets industry standard security guidelines listed on back.
-  **Screened Check Back:** Deters duplication. Screen does not reproduce when copied.
-  **Heat Sensitive Thermochromic Ink:** Red key disappears when subject to heat or touch.
-  **Toner Adhesion (28TA):** Prevents erasure and tampering with laser printed data.
-  **Photocopy Void:** The word "Void" will appear when photocopied.
-  **Security Warning Band Border:** The most popular security border available.

PSM1800

The **PSM1800** makes pressure seal a viable option for small business. It brings all the pressure sealer capabilities to customers processing as few as 6,500 documents per year. It folds and seals all popular fold types with adjustable fold plates.

Features

- Bottom feed system
- Stainless steel rollers
- Variable sheet size
- Catch tray included

Benefits

- Perfect for short run applications
- Secure document processing
- Improved productivity
- Simplicity of design
- Compact and durable without compromising throughput

A CASE FOR BUSINESS

THE CHALLENGE: Streamline payroll

A growing retail franchise in the Midwest has been processing payroll for its 100+ employees manually for years. While this method was manageable when the company first started, it was becoming very time-consuming with every new round of hires, taking up to 100 man-hours annually to process weekly payroll. With plans for expansion, management is seeking ways to automate and streamline the process to save not only time, but money as well.

The business owner explored several pressure-seal systems that could handle a lower volume at a cost that could be amortized in a short amount of time. With three low-volume models to choose from that were well within their budget, PSMailers quickly became the clear choice for this thriving franchise.

The Solution: Low volume, big results

The **PSM1800** proved to be the right match for the company's needs and budget. With the ability to process up to 120,000 documents per year, this low-volume unit has the capacity to meet their current needs and keep up with future demands as they continue to expand. What's more, the PSM1800 system cut the time spent on payroll in half, enabling this small enterprise to achieve a return on investment in little over a year's time.

Streamline your payroll...
while saving time and money!

PSM3000 / PSM3000C

The **PSM3000** is an affordable desktop solution providing a good fit for small business looking to streamline their document processing. Designed for low volume mailings, this folder/sealer has a processing throughput of up to 3,000 forms per hour (PSM3000C includes counter).

Features

- Bottom feed system
- Stainless steel rollers
- Variable sheet size
- Catch tray included

Benefits

- Secure document processing
- Improved productivity
- Simplicity of design
- Compact and durable without compromising throughput

Control Panel
for PSM3000C

PSM3000/3000C Specifications

Fixed Speed	3,000/hour
Duty Cycle	25,000 sheets/month
Fold Types	C, V, Z, EZ
Paper Size	Up to 8½" x 14"
Counter (PSM3000C)	Included
Catch Tray	Included
Size	12" H x 20" W x 16½" D
Weight	55 lbs.
Install	Phone install included
Warranty	6 months

A CASE FOR SCHOOLS

THE CHALLENGE: Making the grade for productivity

A school district with 7,500 students, from elementary to high school, needs to replace its pressure seal system for printing quarterly grade reports. The current top-feeding machine gets a failing grade for its insufficient hopper capacity and processing speed which requires the constant attention of an administrative assistant to stop, reload and restart the machine every few minutes. Not only was the process time-consuming, but it also compromised the confidentiality of the grade reports being processed in this busy district office with visitors frequently coming and going.

Key priorities established by school administration for the new system include increased productivity and capacity, limited visibility of reports as they are processed, and the best value for their investment. A quick search on-line revealed PSMailers to be the smartest solution for this school district.

The Solution: Smart features improve the process

Upon staff recommendation, the district purchased the **PSM3000**, a low-volume pressure seal model that checked all the boxes for productivity, privacy, and price. With a hopper capacity of 250, a more efficient bottom-feed design, and processing speed of 3,000 per hour, this pressure seal solution helped the district greatly improve the grade reporting process overall. Because there is no need to stop the unit during the process, grade reports are now folded, sealed, and ready for distribution in about 30 minutes.

Maintaining Confidentiality...
to protect personal privacy!

LOW / MEDIUM VOLUME APPLICATIONS

Control Panel

PSM5000

The **PSM5000** delivers unparalleled value to the pressure seal market. Ideal for small to midrange users, it includes an integrated conveyor output system to maintain document processing order. A digital counter with a batch-counting mode is provided for accurate record-keeping and document processing. The robust duty cycle, combined with the unique bottom feed system, enables maximum return on your investment dollars!

Features

- Bottom feed system
- Integrated output conveyor
- Digital counter
- Variable speed control
- Stainless steel rollers
- Variable sheet size

Benefits

- Secure document processing
- Improved productivity
- Simplicity of design
- Compact and durable without compromising throughput

PSM5000 Specifications

Fixed Speed	5,000/hour
Duty Cycle	40,000 sheets/month
Fold Types	C, V, Z, EZ
Paper Size	Up to 8½" x 14"
Counter	Manual / Batch
Conveyor	18" conveyor included
Size	12" H x 21½" W x 30" D
Weight	70 lbs.
Install	Phone install included
Warranty	6 months

A CASE FOR NON-PROFITS

THE CHALLENGE: Limited budget, unlimited potential

With the success of several big events over the last year, a regional non-profit organization on the East Coast has greatly increased its database of donors. Poised to expand support for its important cause, the organization still must operate within its limited budget and resources. This is driving their decision-making as they explore an efficient method of processing upwards of 5,000 contribution statements and solicitation mailings per week.

For an operation such as this, a pressure-seal mailing system is the wisest solution for their near and long-term needs. **PSMailers** offer not only a range of models and documents to choose from, but also superior customer/technical support which is crucial to this non-profit group whose employees take on many roles in any given day and often work long hours.

The Solution: Capacity for today – and tomorrow

The **PSM5000**, a medium-volume unit, fit the organization's needs perfectly. With the capacity to process up to 5,000 documents per hour and a duty cycle of 40,000 per month, the PSM5000 offers the flexibility to meet their current – and future – document processing requirements. This folder/sealer model also includes an integrated conveyor and digital counter at no additional cost, providing even more value for this budget-minded organization. Thanks to the efficiency of the PSM5000, this successful non-profit is now in a better position to reach more supporters and fulfill its important mission of helping those in need.

*Bridging the Gap...
between today's needs
and future requirements!*

PSM7000

Control Panel

The **PSM7000** is an integrated folder/sealer with an impressive 7,000 sheets per hour to satisfy even the tightest deadlines. The integrated conveyor output system helps move your forms in a seamless paper stream, while maintaining the processing order. The user-friendly, robust duty cycle makes the **PSM7000** attractive to medium volume, mid-sized organizations.

Features

- Bottom feed system
- Integrated output conveyor
- Digital counter
- Variable speed control
- Stainless steel rollers
- Variable sheet size

Benefits

- Secure document processing
- Improved productivity
- Simplicity of design
- Compact and durable without compromising throughput

PSM7000 Specifications

Fixed Speed	7,000/hour
Duty Cycle	125,000 sheets/month
Fold Types	C, V, Z, EZ, EC return envelope
Paper Size	Up to 8½" x 14"
Counter	Manual / Batch
Conveyor	18" conveyor included
Size	12" H x 21½" W x 30" D
Weight	70 lbs.
Install	Phone install included
Warranty	6 months

A CASE FOR GOVERNMENT

THE CHALLENGE: Variable, heavy-duty demands

The new general manager of a water district, consisting of more than 150,000 ratepayers, is looking for ways to improve its billing process. Even with an online billing option, the district still prints and mails the majority of its bills to property owners; a process handled on different cycles with 110,000 homeowners billed on a quarterly basis and 48,000 commercial properties every month. This presents a unique challenge in choosing a pressure-seal system robust enough to meet large demands annually, but able to manage variable output throughout the year. Would such a folder/sealer system be cost-prohibitive? The GM wondered if this agency could find a system that would fit their needs and their budget.

The Solution: High volume, priced to perform

After careful consideration, the water district staff was pleased to present their new boss with the best billing solution - the **PSM7000**. Designed to process 125,000 documents a month with a variable speed of 7,000 per hour, the PSM7000 system can easily handle the smaller, more frequent runs as well as the long-term demands of the water agency's billing process. Now, the task takes just a few hours monthly and, best of all, this high-volume unit cost half the price of competing models.

Need Robust Duty Cycles...
*there's a PSMailers model
 to fit your requirements!*

PSM10K

Control Panel

The **PSM10K** is an integrated folder/sealer designed for organizations with high-volume applications. The integrated conveyor output system helps move your forms in a seamless paper stream, while maintaining the processing order.

Features

- Bottom feed system
- 36" integrated output conveyor
- Digital counter
- Variable speed control
- Stainless steel rollers
- Variable sheet size

Benefits

- Secure document processing
- Improved productivity
- Simplicity of design
- Compact and durable without compromising throughput

PSM10K Specifications

Variable Speed	10,000/hour
Duty Cycle	200,000 sheets/month
Fold Types	C, V, Z, EZ, EC return envelope and custom folds
Paper Size	Up to 8½" x 14"
Counter	Manual / Batch
Conveyor	36" hinged conveyor included
Size	12" H x 21½" W x 41" D
Weight	75 lbs.
Install	Phone install included
Warranty	6 months

A CASE FOR HEALTHCARE

THE CHALLENGE: Multiple sources, multiple problems

A large healthcare facility, with multiple locations in the county prints and mails invoices and other important information to patients throughout the year. Each location utilizes different brands of folder/sealers and document styles procured from various sources, which has created a number of ongoing and costly problems for the organization. Placing orders and troubleshooting issues with multiple vendors is becoming more time-consuming and frustrating for busy office administrators. The inefficiency is too large to ignore. Looking to streamline the mailing process and reduce vendor issues, the facility is looking to start over with a new, centralized folder/sealer system and documents provided by a single source that reliably delivers the best products, service, and value.

The Solution: Single-source success

It didn't take long for a **PSM**ailers representative to convince this struggling organization of the right choice. First, a **PSM10K** was recommended to handle the large volume of documents processed each week now from one central location. Then, the representative consulted with facility on the complete line of **PSM**ailers documents that work effortlessly with the new system, helping them carefully select the best folding style and imprint options for each type of mailing. What really sealed the deal is the superior service provided by **PSM**ailers with a simple phone call or email. Now the facility can turn to a single source for all their pressure seal equipment and documents issues and needs. Operating more efficiently and cost-effectively, it's just what the doctor ordered.

A One-Source Solution...
*providing responsive
 aftermarket support!*

PSM6500 Specifications

Fixed Speed	3,000 per hour
Duty Cycle	30,000 sheets/month
Fold Types	C, V, Z, EZ, EC
Paper Size	Up to 8½" x 14"
Counter	Included
Size	18½" H x 16¼" W x 28" D (with tray)
