Accessories For Your PSMailers Equipment

Sound Cover

For PSM Models 5000, 7000 & 10K
(includes 1 front and 1 back cover per set)

Front Cover

Back Cover

Sound Cover Benefits:
- Provides extra safety for machine operation and performance.
- Reduces decibel level of equipment, enhancing work areas situated close to equipment.
- Higher speeds = louder operations. Sound covers are a **must** for high speed units.
- Protects rollers from dust and debris when not in use.

Cleaning Kit
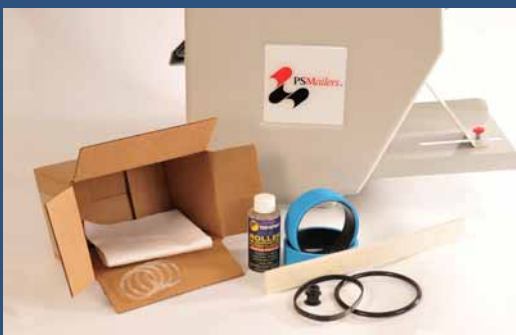

These complete kits feature PSMailers recommended premium-quality products in one convenient, affordable package. Clean, condition, and protect your equipment investment (parts may vary depending on model).

Table of Contents

PSMailers... *The Complete Solution*

PSM*ailers* pressure seal self-mailer is designed to **fold, seal, and mail in much less time than conventional printing and mailing processes.** There are a variety of **PSM***ailers* models to choose from, one for every size or volume business.

Everything you need is in one complete package: pressure seal documents and equipment. Whether you use **PSM***ailers* for payroll and/or report processing, accounting, billing, direct mail or one of the many other applications, you'll see a difference almost immediately in cost savings, greater productivity and more versatile document capabilities.
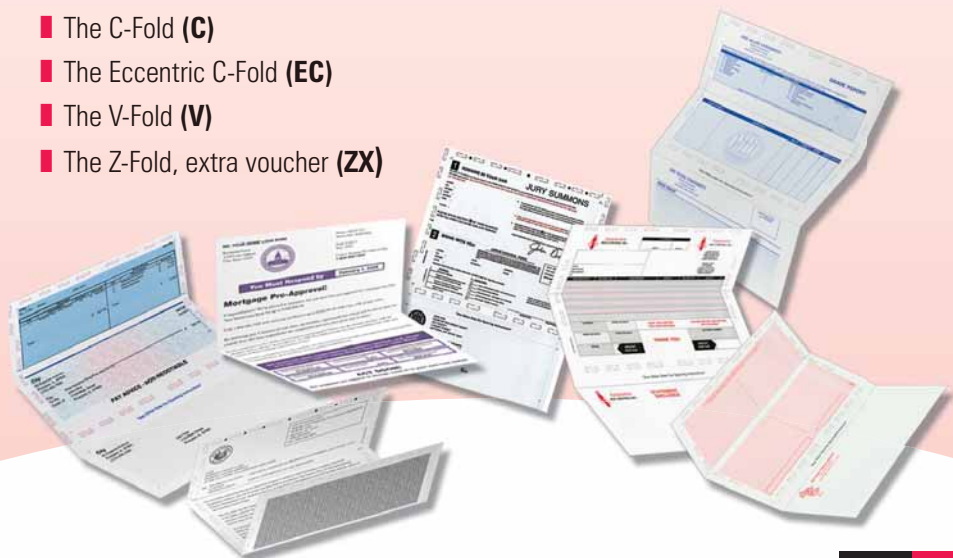

PSM*ailers* Checks & Forms

Checks and forms are available in most popular fold types and are *guaranteed* to work with our equipment. **PSM***ailers* checks offer a wide variety of security features to prevent fraud and are Check 21 compliant.
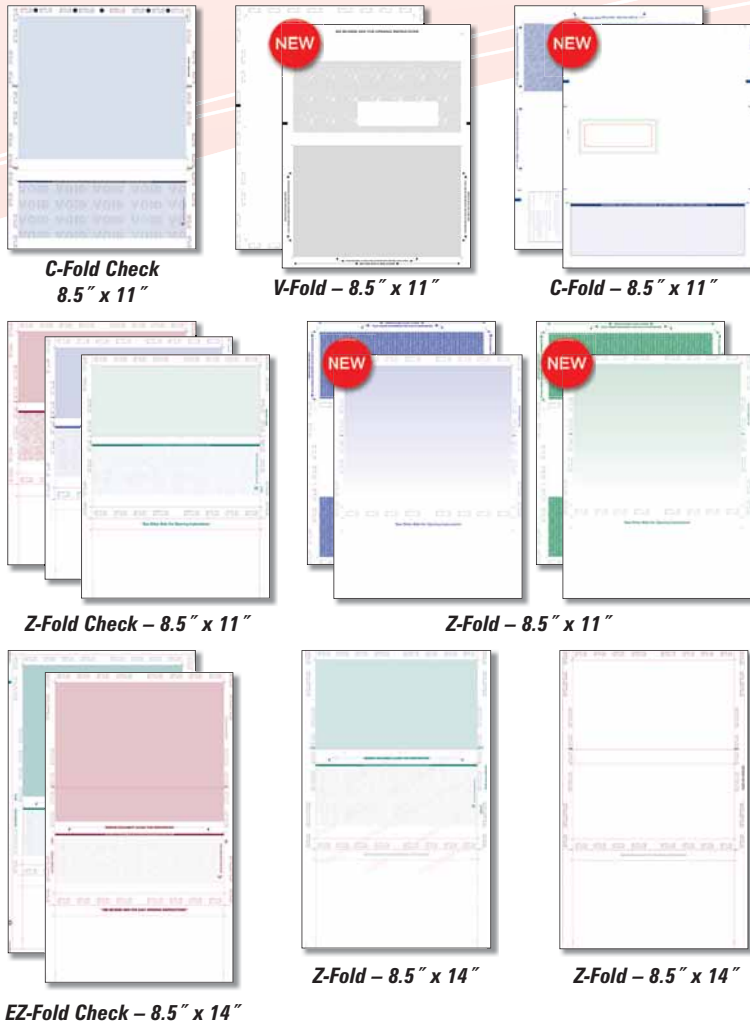

PSM*ailers* Fold Styles

There are six fold styles giving you virtually unlimited options for the various applications your business demands:

- The versatile Z-Fold, the most popular **(Z)**
- The Eccentric Z-Fold **(EZ)**
- The C-Fold **(C)**
- The Eccentric C-Fold **(EC)**
- The V-Fold **(V)**
- The Z-Fold, extra voucher **(ZX)**

Built-in Security Features

Chemical Stain (24DC, 28TF): Sensitized paper reacts to chemical attempts to alter check.

Invisible Fluorescent Fibers in Paper (24DC, 28TF): Fibers in paper stock are revealed under a black light.

Microprinting Below Endorsement Area: Line copy reads "Original Document." When copied, the wording is not readable.

Padlock Icon: Indicates check meets industry standard security guidelines listed on back.

Screened Check Back: Deters duplication. Screen does not reproduce when copied.

Heat Sensitive Thermochromic Ink: Red key disappears when subject to heat or touch.

TonerFuse® (28TF): Prevents erasure and tampering with laser printed data.

Photocopy Void: The word "Void" will appear when photocopied.

Security Warning Band Border: The most popular security border available.

PSM1800

The **PSM1800** makes pressure seal a viable option for small business. It brings all the pressure sealer capabilities to customers processing as few as 6,500 documents per year. It folds and seals all popular fold types with adjustable fold plates.

Features
- Bottom feed system
- Stainless steel rollers
- Variable sheet size
- Catch tray included

Benefits
- Perfect for short run applications
- Secure document processing
- Improved productivity
- Simplicity of design
- Compact and durable without compromising throughput

PSM1800 Specifications

Fixed Speed	1,800/hour
Duty Cycle	10,000 sheets/month
Fold Types (8½″ x 11″)	C, V, Z
Fold Types (8½″ x 14″)	Z, EZ
Paper Size	Up to 8½″ x 14″
Break-Even	6,500 documents/year
Catch Tray	Included
Size	12″ H x 20″ W x 16½″ D
Weight	50 lbs.
Install	Phone install included
Warranty	6 months

The Business Challenge – Decentralize Printing

A national food processing company with multiple locations is looking for a method to streamline their decentralized payroll processing. Each location employs 125-300 people who are paid weekly. The annual time and cost associated with the current method of payroll is quite high and a major concern to management. Annually, it costs between $1,900 to $4,500 and takes 80-180 man-hours to process payroll for all locations.

As with any business, every cost reduction and time-savings, no matter how small, improves the overall health of a business, and this company is no different.

A pressure seal system seemed to be a natural fit but *other systems were cost prohibitive* and, because of the weekly payroll and the physical location of some facilities, a centralized method was not an option.

The Solution

The **PSM1800** was introduced to this customer as the perfect solution to solve their payroll woes. Even their smallest operations were able to achieve a return on investment in *two years or less.* On average, across the entire network of food processing plants, the company saved 125 man-hours and $1,800 each year by switching to the **PSM1800**.

Streamline your payroll... while saving time and money!

The School Challenge – Improve Productivity

A high school needs a better processing method for the more than 2,700 grade reports they print and distribute to their students each quarter. Their *current method is mostly manual* with large time intervals where grade reports are not processed and visible to anyone visiting the office. *Confidentiality is a concern* to the school administration.

The school considered a pressure seal system that included a *top-feeding folder/sealer* with an input hopper of only 100 documents and a processing speed of 5,200 documents. Due to the low input hopper capacity, the folder/sealer would have to be stopped, loaded, and restarted 27 times (about once every minute) by the operator to complete the quarterly grade reports.

It was determined this system would do little to improve processing time or confidentiality because of the frequent stopping, loading, and restarting.

The Solution

The **PSM3000** was presented to the school giving them exactly what they were looking for to *improve the grade reporting process*. All **PSM***ailers* utilize a *bottom-feed system*. Because there is *no need to stop the unit during the process*, grade reports are folded, sealed, and ready for distribution in about 30 minutes – *greatly improving processing times and student confidentiality.* All for *considerably less than a top-feeding system* without sacrificing any features!
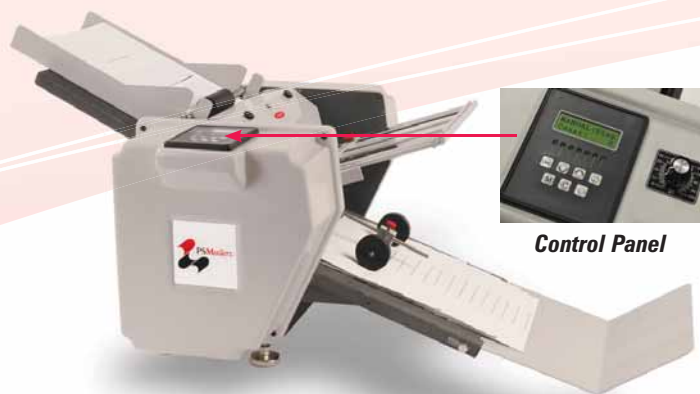

*Maintaining Confidentiality...
to protect personal privacy!*

The Non-Profit Challenge – Control Costs, Improve Operations

This growing regional non-profit organization sees a bright future ahead as supporters continue to promote its cause and donations keep on growing. It continues to gain national exposure, which is great, but they need efficient office operations to handle their success. As non-profits go, *budgets and human resources are limited* and it needs an efficient method of processing contribution statements and solicitation mailings on a weekly basis.

This group began a search for a pressure seal system which could handle all of its operational needs now and for its increasingly busy future. Wanting to use its money wisely, an Internet search provided several options, but **PSM***ailers stood out amongst them all because of its value* and ability to help the non-profit grow well into the future.

The Solution

The **PSM5000** is a compact unit with the versatility to distribute contribution statements to donors and solicit for new donations. With a duty cycle up to 40,000 sheets per month, it is the perfect size to handle all their requirements now and to also take them to the next level. **PSM***ailers* helped the non-profit refocus their resources efficiently and allowed the volunteers to focus on the people for whom their organization valiantly crusades.

Bridging the Gap...
**between today's needs
and future requirements!**

The City's Challenge – Duty Cycles

A Midwest city, with a population over 160,000 and more than 77,000 housing units, was *struggling* to get out their residents' monthly water bills. The city prints and mails more than 900,000 water bills annually, but only bills approximately one-quarter of their residents each week, totaling less than 18,000 invoices weekly.

The city *would like to purchase a folder/sealer* capable of processing their weekly volume in 3-4 hours and also handle their total annual volume. However, to get a folder/sealer capable of handling their annual volume, the city thought they would have to spend more than $12,000, which is not in their budget.

The Solution

The head of the water department, convinced a pressure seal was still the *best solution for the city*, refused to give up. Searching the Internet, she came across **PSM***ailers* and discovered there were several models featuring attractive duty cycles.

Knowing she finally found a line of equipment with robust duty cycles, she then focused on finding the best model to fit her requirements and budget. After careful consideration, she chose the **PSM7000** because it could process her weekly water bills in less than 3 hours, and also had the capability to handle their annual volume. Best of all, the **PSM7000** cost *half the price* of the competitors' models.

Need Robust Duty Cycles...
there's a PSMailers model
to fit your requirements!

The Healthcare Challenge – Single Source

A healthcare insurance provider has been using a *pressure seal solution for nearly 2½ years* to handle the burden of Explanation Of Benefits (EOB) and flexible spending account disbursement checks. However, the system is extremely *problematic.*

The insurance provider purchased the unit from one source that pieced the system together using various manufacturers and purchased the documents from a vendor who continually changes his source, which only compounds the problem. When the insurance provider needs help, the folder/sealer service technician blames the problem on the documents not the system. The documents vendor blames the folder/sealer manufacturer, and nothing ever gets resolved.

Tired of the finger-pointing, the frustrated insurance provider was ready to scrap the entire system and go back to their old method of stuffing and sealing envelopes.

The Solution

A local **PSM***ailers* representative saved the day! A **PSM10K** was installed to replace their old folder/sealer. A fresh batch of **PSM***ailers* documents were ordered, produced, and shipped to replace the previous supply. And, most importantly, the insurance provider *eliminated all the finger-pointing* by choosing *a single source for their equipment and documents.* Now, if there's an issue and service is required, the insurance provider knows the entire **PSM***ailers* team will work together to remedy the situation and get them back to work!

A One-Source Solution...
providing responsive aftermarket support!
